Gemini's New Mini Stud Block Offers Sign Installers More Flexibility

FOR IMMEDIATE RELEASE

Cannon Falls, MN — Gemini Incorporated, a leading manufacturer of dimensional letters, logos and plaques for the sign industry, has just made installing thin-gauge products a whole lot easier with the introduction of a new small acrylic stud block.

Suitable for use with any of Gemini's Acrylic, Metal Laminate on Acrylic and GemLeaf™ products, this is a great option for thin-gauge, thin-stroke letters that need to be mounted flush to the surface.

The overall block dimensions are 1/4" x 3/16" deep. The blocks are threaded for 6-32 (1/8") studs. What makes these stud blocks perfect for flush mount applications is their small precise size. Once applied to the back of a letter, you can install the letters as either a 3/16" standoff or, if the stroke of the letter is wide enough, recess the entire block into the mounting surface for a flush stud option. For the flush mount application, all that needs to be done is to drill a normal hole for the stud and then countersink or widen the edge of the hole to accommodate the small acrylic block.

For more information about Gemini letters, logos and plaques, please call Gemini toll-free at 1-800-538-8377 or visit www.signletters.com.
